ABOUT

Seattle native full stack developer living in Utah. Recently graduated from a University of Utah full stack development bootcamp, and currently working as a desktop technician for Tams Computer Recycling. Seeking opportunities as a developer that leverage my coding skills and B.S. in Economics from Brigham Young University.

CODING SKILLS

- HTML
- CSS
- JavaScript
- React
- Git
- C++
- MERN
- Node.js
- jQuery
- Ajax
- MySQL
- MongoDB

PROJECTS

Trade & Play

- MERN stack application which allows users to create accounts, and open booster packs to build their collection of sports cards!

Sports League Manager

- Application where users can create, manage, and search for local sports leagues. Uses an MVC design, user authentication and MySQL db.

EDUCATION

[B.S. Economics Major, Business Mgt Minor \(Graduated 2019\)](#), BRIGHAM YOUNG UNIVERSITY

Economics & Business student, with a focus on big data analytics, economical modeling, and general business management. Learned to use R, Stata, and Excel to run regressions and build models for large datasets.

[Full Stack Development Coding Bootcamp \(Completion May 2020\)](#), UNIVERSITY OF UTAH

Full Stack Flex developer bootcamp, with a focus on web development and learned the languages and skills necessary to become a full stack developer.

EXPERIENCE

July 2019 - current

[Desktop Technician](#), TAMS COMPUTER RECYCLING AND SALES

Working in the tech department, mainly refurbishing computers and production. Work includes analyzing and diagnosing software and hardware issues with computers and coming up with solutions to fix such problems. Responsible for managing large quantities of desktop inventory and carrying out large projects in a timely manner.

Summer 2017

[Real Estate Development Intern](#), JCJ INVESTMENT / ACCLAIM COMPANIES (REAL ESTATE DEVELOPERS)

Shadowed several partners, site managers, and property managers to learn and provide support with daily operations. Work included working as a property manager, conducting market research & analysis, managing property inspections, analyzing budget variance reports on current projects, and planning and organizing current asset maintenance.

May-August 2015

[Office Manager](#), ORACLE CORPORATION

Managed the front-desk for Seattle Oracle Office. Responsibilities included managing secure access, coordinating facilities usage, and coordinating customer visits.
